### **Restriction Requirement**

**1.**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Independent claims 1, 24, 27, 34, 51, 57, 60, 67, 70, 71, 72, 75 and 78 and the dependent claims directed thereto are, drawn to an image output apparatus, system or method connected over a communication medium, classified in class 358, subclass 400.
- II. Claims 12, 45, 68, 73, 74, 76 and 77, and the dependent claims directed thereto are, drawn to an input/output apparatus, system or method connected to a printer via communication medium, classified in class 358, subclass 1.15.
- III. Claims 18 and 69, and the dependent claims directed thereto, drawn to an input/output apparatus connected to a reading apparatus via communication medium, classified in class 358, subclass 474 or 476

The inventions are distinct, each from the other because:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility from II and III in that the input/output apparatus does not require being input to a reader or a printer. The input/output apparatus could simply read on a copier machine, a DVD player, a telephone, PDA or . See MPEP § 806.05(d).

Art Unit: 2626

2.

Group II and III are separate and distinct in that an input/output apparatus with a printer function does not have to use the particulars of a reader and conversely the apparatus with the reader does not have to use the particulars of the printer. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4.
